

System S&P[®]
The Natural Wheel
Compact Module Sewage Plants

Editorial

Editorial

Since its founding in 1983, System S&P has been a family-run business, with customer satisfaction as the top priority. The taking action is to earn the trust of the customers every day anew and achieve common growth.

System S&P develops and manufactures as a „hidden champion“ in Kirchberg an der Jagst. The systems are delivered worldwide and put into operation. The reliable concept is: teamwork – Made in Germany.

System S&P is committed to providing high quality environmental engineering solutions for small to medium sized applications. The core competence of System S&P are compact systems with qualified biofilm processes, such as the globally well-proven RBC with plane-parallel solid discs made of Polypropylene in diameters of up to 3 m.

The System S&P product range is modular, robust and simple.

The solutions from System S&P are energy-saving, fool-proof and low-maintenance.
